Dear Grower

AGROCHEMICALS APPROVED BY THE TOBACCO RESEARCH BOARD: 30 OCTOBER 2020

The agrochemicals approved for use on tobacco by the Tobacco Research Board during the fourth quarter of 2020 are shown in Table 1. Any agrochemical not appearing in the table is either not currently countenanced by the TRB or has been removed from the list of approved agrochemicals based on the provisions of the new Pesticide Approval Scheme Service which came into effect on 1 July 2011. The list of agrochemicals which TRB no longer approves for use on tobacco and whose approvals will not be renewed are shown in Table 2.

As over 90% of the Zimbabwean tobacco crop is exported, the tobacco must meet stringent international agrochemical regulations for international acceptance and maintenance of markets especially in an increasingly competitive global market. In this regard, Pendimethalin (a suckercide) is no longer recommended for use on tobacco due to high residues detected on cured leaf. Fortunately, effective alternative suckercides, Flumetralin and N-Decanol are already registered for use by growers.

Should there be any queries regarding the above, or if further information on a particular product, is required, please feel free to contact Kutsaga Research Station's Crop Productivity and Plant Health Services Divisions on telephone (0242) 2575 289-94 or toll-free, 0800 4511 or Email: tobres@kutsaga.co.zw or visit Kutsaga Research Station, Airport Ring Road, Harare.

Yours faithfully,
